Squash and Zucchini

CROP GUIDE

®

Medium green zucchini

Payout (GN0113)

An attractive medium-green glossy fruit with an open, spineless plant ideal for the Eastern USA growing region. Featuring PRSV resistance resulting in healthier plants and higher yield and profit potentials.

- Ideal variety for the Eastern USA growing region
- Resistance package helps keep plant healthy throughout season to maximize yield potential
- Open plant and spineless petioles minimize fruit damage during harvest and save time and labor
- Easy picking peduncle

Payload

- Glossy zucchini with cylindrical, uniform shape
- Medium-green color slightly darker than Paycheck
- Open plant with reduced spines
- Medium vigor growth habit

Spineless Perfection

Offering a superior disease resistance package, Spineless Perfection produces abundant yields of medium green zucchini with high consumer appeal.

- Spineless petioles minimize fruit damage during harvest
- Classic Spineless Beauty-type fruit with high gloss
- Open, upright plant habit for ease of picking
- Refined flecking produces a rich green color
- Similar yields to Spineless Beauty

Spineless Beauty

- Industry standard
- Glossy, high-quality fruit
- Truly spineless plant
- High yield potential
- Adapted to all eastern U.S. growing areas

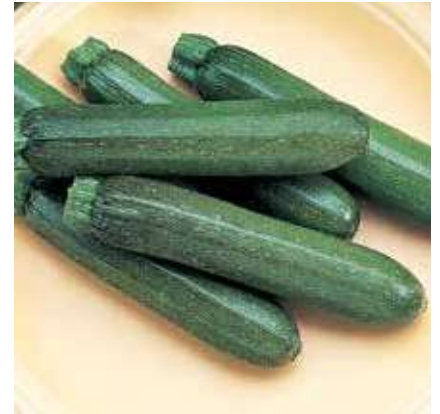

Payroll

- Performs well under spring and summer conditions
- Widely adapted
- Excellent fruit quality
- Upright plant

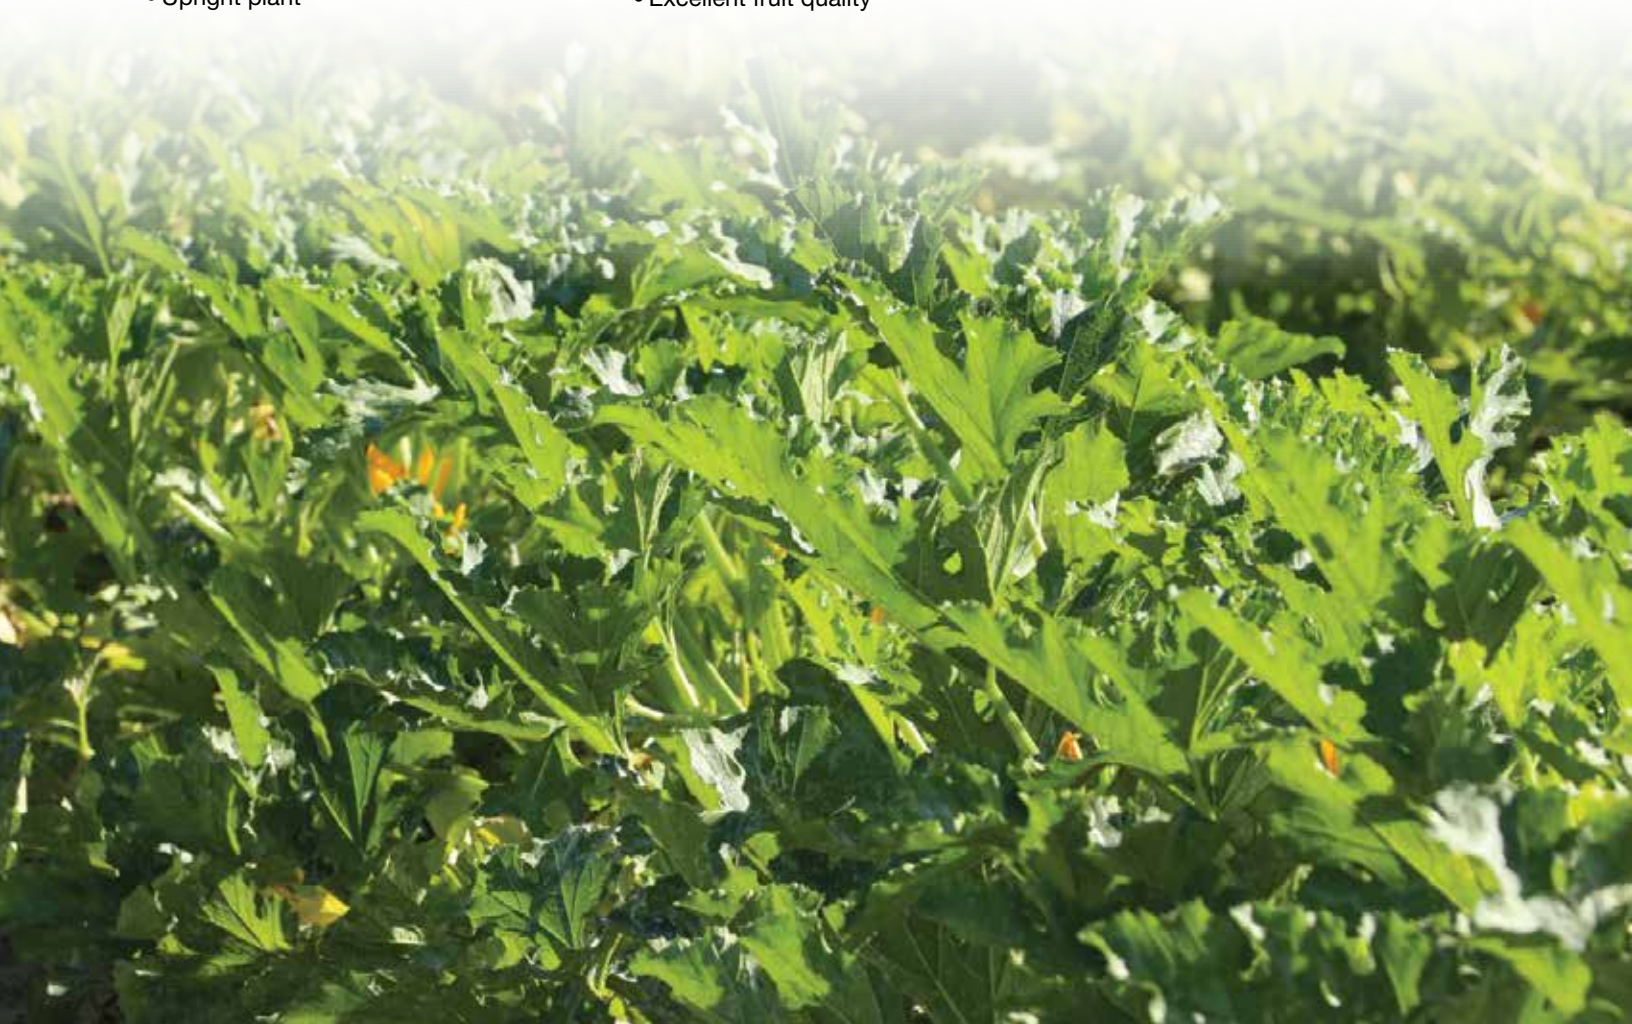

Paycheck

- Good for fall season when CMV can be an issue
- Very good adaptability
- High yield potential
- Excellent fruit quality

Cashflow

- Consistent high yield potential
- Very good adaptability
- Excellent fruit quality
- Vigorous plant

Medium-dark green zucchini

Everglade

Everglade is a medium-dark green zucchini for the eastern U.S. market with robust virus and disease resistance and strong yield capability. It features an open, upright plant and offers improved fruit quality with desirable color and flecking.

- Dark, glossy, cylindrical fruit
- Open plant and reduced spines
- High yield potential
- Robust disease and virus resistance package

Spineless Supreme

- Glossy, club-shaped fruit
- Refined flecking produces a rich green fruit color
- Attractive, high gloss fruit appeals to buyers
- Open plant habit saves time and labor
- Resistance package helps keep plant healthy throughout season to maximize yield potential

Envy

- Attractive, glossy fruit with uniform, medium-dark coloring
- More vigorous plant than comparable varieties
- Open, upright plant structure offers easier harvest and minimized fruit damage

Pascola

Dark green zucchini

Ebano

- Produces cylindrical, dark green, attractive fruits
- Medium plant vigor and open, erect plant
- Suitable for early season due to good heat setting
- Produces high-quality fruits that are ideal for export market

Pascola

- Outstanding disease resistance
- Slender-type fruit
- Nearly spineless plant
- Good for mid- to late-season plantings as CMV pressure increases
- High yield potential in early harvests
- Uniform, dark green, glossy fruit, medium to long in length
- Open, upright, nearly spineless plant for improved fruit quality during harvest

Equinox

- Produces cylindrical, dark green, glossy fruits
- Upright, vigorous plant with good cover
- Excellent fruit quality
- Great yield potential over an extended harvest period in California and northwestern Mexico

Noche

- Nearly spineless plant
- Excellent fruit quality
- Proven yield performance

Raven

- Industry standard
- Outstanding yield potential
- Proven performance
- Open plant habit

Jacobo

- Improved disease resistance
- Good early yield potential
- Glossy, attractive fruit

Golden zucchini

Golden Glory

Similar to Golden Delight, Golden Glory offers the added benefit of intermediate resistance to powdery mildew. It produces high yields of quality, smooth, uniform, golden yellow fruit.

- Improved disease resistance
- Upright plant
- High yield potential

Yellow squash

Grandprize

Grandprize is a straightneck squash variety that produces high quality fruit with a glossy, deep yellow appearance and green peduncle. It boasts an enhanced disease package and vigorous plant that helps deliver solid yield performance over other yellow straightneck varieties.

- Glossy, deep-yellow fruit with strong outer walls
- Erect, semi-open plant with reduced spines
- Strong outer texture to withstand harvest, packing, and transport
- Plants reach maturity quickly and deliver solid yield potential

Goldprize

- Improved disease resistance
- Glossy, smooth fruit
- Attractive yellow color
- Excellent quality fruit with uniform shape for a high-quality pack
- Longer harvest and improved fruit quality thanks to excellent disease protection
- Higher yield potential for better profitability

Enterprise

- Proven performance
- Outstanding yield potential
- Vigorous plant
- Broad adaptability

Fortune

- Excellent fruit smoothness and uniformity
- Early-maturing plant with medium vigor and continuous setting ability
- High-quality fruit with good yield capabilities
- Sturdy plant neck offers minimized chance of breakage

Gentry

- Industry standard
- Broad adaptability
- Small blossom scar
- Smooth, high-quality fruit

Gold Star

- Improved disease resistance
- Reduced spines
- Vigorous plant

Gray Zucchini

San Isidro

A darker gray zucchini variety, San Isidro includes an intermediate disease resistance package with an extended harvest window for excellent yield potential. The open, nearly spineless plant has uniformity and an attractive appearance.

- High-quality fruit with excellent yield potential
- Uniform shape and appearance
- Nearly spineless open plant with no silvering
- Extended harvest window due to disease resistance package

San Martin

- Produces attractive gray colored fruit with skin that has good tolerance to bruising
- Medium plant vigor
- Open, erect plant
- Good disease resistance package including intermediate resistance to Papaya ringspot virus (PRSV)

Specialty

Sunburst

- High-demand variety for both full-size and baby vegetable markets
- Unique, glossy, deep yellow fruit that consumers prefer with dark green blossom end
- Tender, buttery flavor sustained in larger, mature squash
- Compact, bushy plant
- Adapted to all major production areas

Brice

- High yield potential
- Uniform, round zucchini with a light green color
- Easy picking peduncle and an easy access plant with reduced spines
- Suitable for open field cultivation due to strong disease package
